PLAYSPACE 1 (EASTON STREET) ; 2-12yo Targeted

PLAY MODULE

This large play module has something to appeal to all age groups - a junior play zone within the lower tower connects via an elevated bridge to more challenging activities in the taller section. Two different height slides & a variety of climbing options to reach the platforms cater to a range of confidence levels, while games panels and crawl tunnels at ground level are provided for toddlers and all abilities access actvities.
The fort style play module has generous colorbond skillion roofs and slatted easy care composite timber walls to help shade and keep play areas cool.

PLAY MODULE (VIEW ONE)

COMMUNITY SWING

Swinging is a favourite park play activity, and the proposed unit has a seating option suitable for all ages and abilities.

PLAY MODULE (VIEW TWO)

NATURAL MATERIALS scattered through the playspace provides a visual and tactile sensory experience, with rock and log steppers combining to form low level agility & and balance trails.

SPRING PLAY is positioned close to other junior play items , and provides an opportunity to select a themed unit to add some personality to the playspace
(Kookaburra shown as example only)

SEESAW ROCKER

A modern version of the seesaw, this item encourages socializing & co-operative play .

HALF PLAYING COURT - The active space flanks the central seating area, making it convenient carers that are supervising younger children in the playground areas to be in close proximity to older children playing in the active space.
When not in use for basketball or netball, the space can also be used as an offstreet pavement area to safely ride scooters, play other games such as backyard cricket, or use the hardstand to set up temporary table settings/shade marquees for events such as street parties.

Retaining large open grass areas gives a visually and physically soft surface to picnic, play games, or relax .

Predominatley neutral colors and materials allow bright accents to catch the eye, and add a playful feeling to the area.

Shade trees and bedding plants create an attractive and confortable place to visit.

Fencing running along the Dwyer St boundary restricts direct access to roadways improve safety, and is softened with plantings to make more unobtrusive.
